Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Ces découvertes sont intéressantes à plusieurs points de vue. Notre confrère nous a aussi envoyé une forme très-curieuse d'un *Centaurea* (section *Jacea*) et que nous croyons n'avoir jamais observée en Belgique. La forme des écailles de l'involucre la rapproche un peu du *C. amara* des contrées méridionales, mais les feuilles, qui sont blanchâtres-cotonneuses, l'en éloignent. Ce sera probablement une variété du vrai *C. Jacea*, qui est du reste rare dans le pays.

BIBLIOTHÈQUE.

Dons faits à la Société :

Index to the native and scientific names of indian and other eastern economic plants and products. Prepared under the authority of the Secretary of State for India in council, by J. Forbes Watson, reporter on the products of India; 1 vol. in-8°, London, 1868.
